

## Jarrón Club

Jarrón Club was founded in 2011 as a group of friends willing to promote their hobbies and using it as a tool to give youth space and voice to express their needs and ideas.

Some of the activities we develop are circus arts teaching (juggling, theatre), inclusive leisure activities, promotion of healthy lifestyles, creativity and art, boost youth employment through the empowerment of our youth population, protection of the environment, promotion of democracy and social participation and fighting against oppression. Always collaborating with other social agents with similar objectives to increase the repercussion of our actions, meetings and events where we put into practice our values and objectives.

With our work, we intend to develop social awareness in gender perspective, ecology, creativity, the inclusion of minorities and promotion of human rights through non-formal education, cooperation with local agents and innovative approaches to getting things done.
