Methodologies for European Trainers in Action

Erasmus+ Training Course

Madrid 14. – 19.11.2022

“The main objective of this mobility of youth workers is to develop a common training methodology at the European level among all partners coming from different backgrounds based on the needs of volunteers and organisations. We will offer youth workers skills and tools to implement innovative and inspirational trainings for volunteers in their local communities as well as Erasmus+ mobility programs. In order to achieve this goal, we will design a non-formal education methodology inviting youth workers from our local community and professionals working in the field of volunteer training and management.”

Participants profile

- Aged 18+
- Youth workers, trainers, facilitators, youth leaders, mentors, volunteers, teachers
- Open to newcomers and future youth workers
- Able to work in English language
- Active learners motivated to take part in all stages of the project: preparation, implementation and follow-up phases
